Mitsubishi Corporation

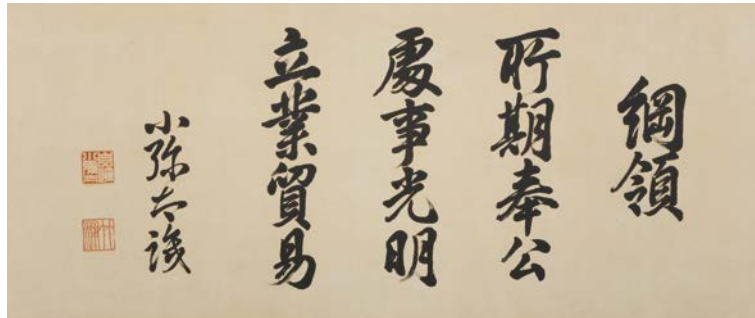

Introduction

Mitsubishi Corporation (MC) is a global integrated business enterprise that develops and operates businesses together with its global network of around 1,700 group companies.

MC has 10 Business Groups that operate across virtually every industry: Natural Gas, Industrial Materials, Chemicals Solution, Mineral Resources, Industrial Infrastructure, Automotive & Mobility, Food Industry, Consumer Industry, Power Solution and Urban Development. Through these 10 Business Groups plus the addition of its Industry Digital Transformation Group and Next-Generation Energy Business Group, MC's current activities have expanded far beyond its traditional trading operations to include project development, production and manufacturing operations, working in collaboration with our trusted partners around the globe.

With an unwavering commitment to conducting business with integrity and fairness, MC remains fully dedicated to growing its businesses while contributing to a prosperous society.

Corporate Philosophy – The Three Corporate Principles

The Three Corporate Principles were formulated in 1934 as the action guidelines of Mitsubishi Trading Company (Mitsubishi Shoji Kaisha), based on the teachings of Koyata Iwasaki, the fourth president of Mitsubishi.

Although Mitsubishi Trading Company ceased to exist as of 1947, the principles were adopted as MC's corporate philosophy, and this spirit lives on in

the actions of today's management and employees. The Three Corporate Principles also serve as the cornerstone of the management ethos of the so-called Mitsubishi group of companies. Active in many business fields and united by a common history and philosophy, the Mitsubishi companies continue to grow through a strong spirit of friendly competition with one another.

Corporate Responsibility to Society

"Shoki Hoko"

Strive to enrich society, both materially and spiritually, while contributing towards the preservation of the global environment.

Integrity and Fairness

"Shoji Komei"

Maintain principles of transparency and openness, conducting business with integrity and fairness.

Global Understanding Through Business

"Ritsugyo Boeki"

Expand business, based on an all-encompassing global perspective.

(The modern day interpretation of the Three Corporate Principles, as agreed on at the Mitsubishi Kinyokai meeting of the companies that constitute the so-called Mitsubishi group in January 2001.)

Corporate History

Foundation to 1970s

- 1954** Mitsubishi Shoji was newly founded and listed on both the Tokyo and Osaka stock exchanges.
- 1967** Announced its first management plan.
- 1968** Made its first large-scale investment by committing to a large LNG (liquefied natural gas) development project in Brunei.
- 1971** Made "Mitsubishi Corporation" its official English name.

The 2000s

- 2001** Introduced an aggressive blueprint for growth titled "MC2003" which involved expanding the company's value chains, strengthening its profitability, and focusing strategies to create new businesses.
- 2004** Unveiled "INNOVATION 2007" which sought to establish MC as a "New Industry Innovator" by accelerating the company's research and development activities to respond to future strategic fields.

2020s

- 2021** Established "Roadmap to a Carbon Neutral Society."
- 2022** MC announced its new three-year management plan entitled, "Midterm Corporate Strategy 2024 - Creating MC Shared Value." This plan sets the goal of continuously creating significant shared value by enhancing the MC Group's collective capabilities to address societal challenges.

The 1980s to 1990s

- 1986** Drew up a management plan and new policy that shifted the company's focus from operating transactions to profits.
- 1992** Announced a management policy to reinvent the company as a "Sound, Global Enterprise." Began placing greater focus on its consolidated operations and increasing the value of its assets.
- 1998** Announced "MC2000" which introduced a "Select & Focus" approach to business, strengthened strategic fields, and emphasized customer-oriented policies. The new plan was instrumental in shoring up the company's foundations and paving the way to a prosperous future.

2010s

- 2010** Announced "Midterm Corporate Strategy 2012" which sought to strengthen the company's management platform based on the diversification of business models.
- 2016** Released "Midterm Corporate Strategy 2018" with a corporate vision to leverage MC's ingenuity to create new business models and generate value for societies, thereby developing the highest level of management expertise.
- 2018** Announced "Midterm Corporate Strategy 2021."

Global Network (Countries and Regions) (As of April 1, 2023)

MC has developed a global network to drive its next phase of major growth by continuously improving its ability to respond to change while also encouraging collaboration through the efficient and effective allocation of roles between the Head Office, MC offices and subsidiaries, and group companies.

The MC Group operates in a rapidly evolving business environment, both in Japan and around the world, with heightening geopolitical risks and an increasingly borderless global society and market.

In response to these swift and complex changes, and in order to accelerate the implementation of its business management model, MC leverages its global network in around 90 countries and regions worldwide, to gather and communicate relevant, real-time business intelligence. This enhanced global network is used to identify potential sources of growth and new business opportunities, as well as to bolster risk management practices and ultimately support the expansion of the

MC Group.

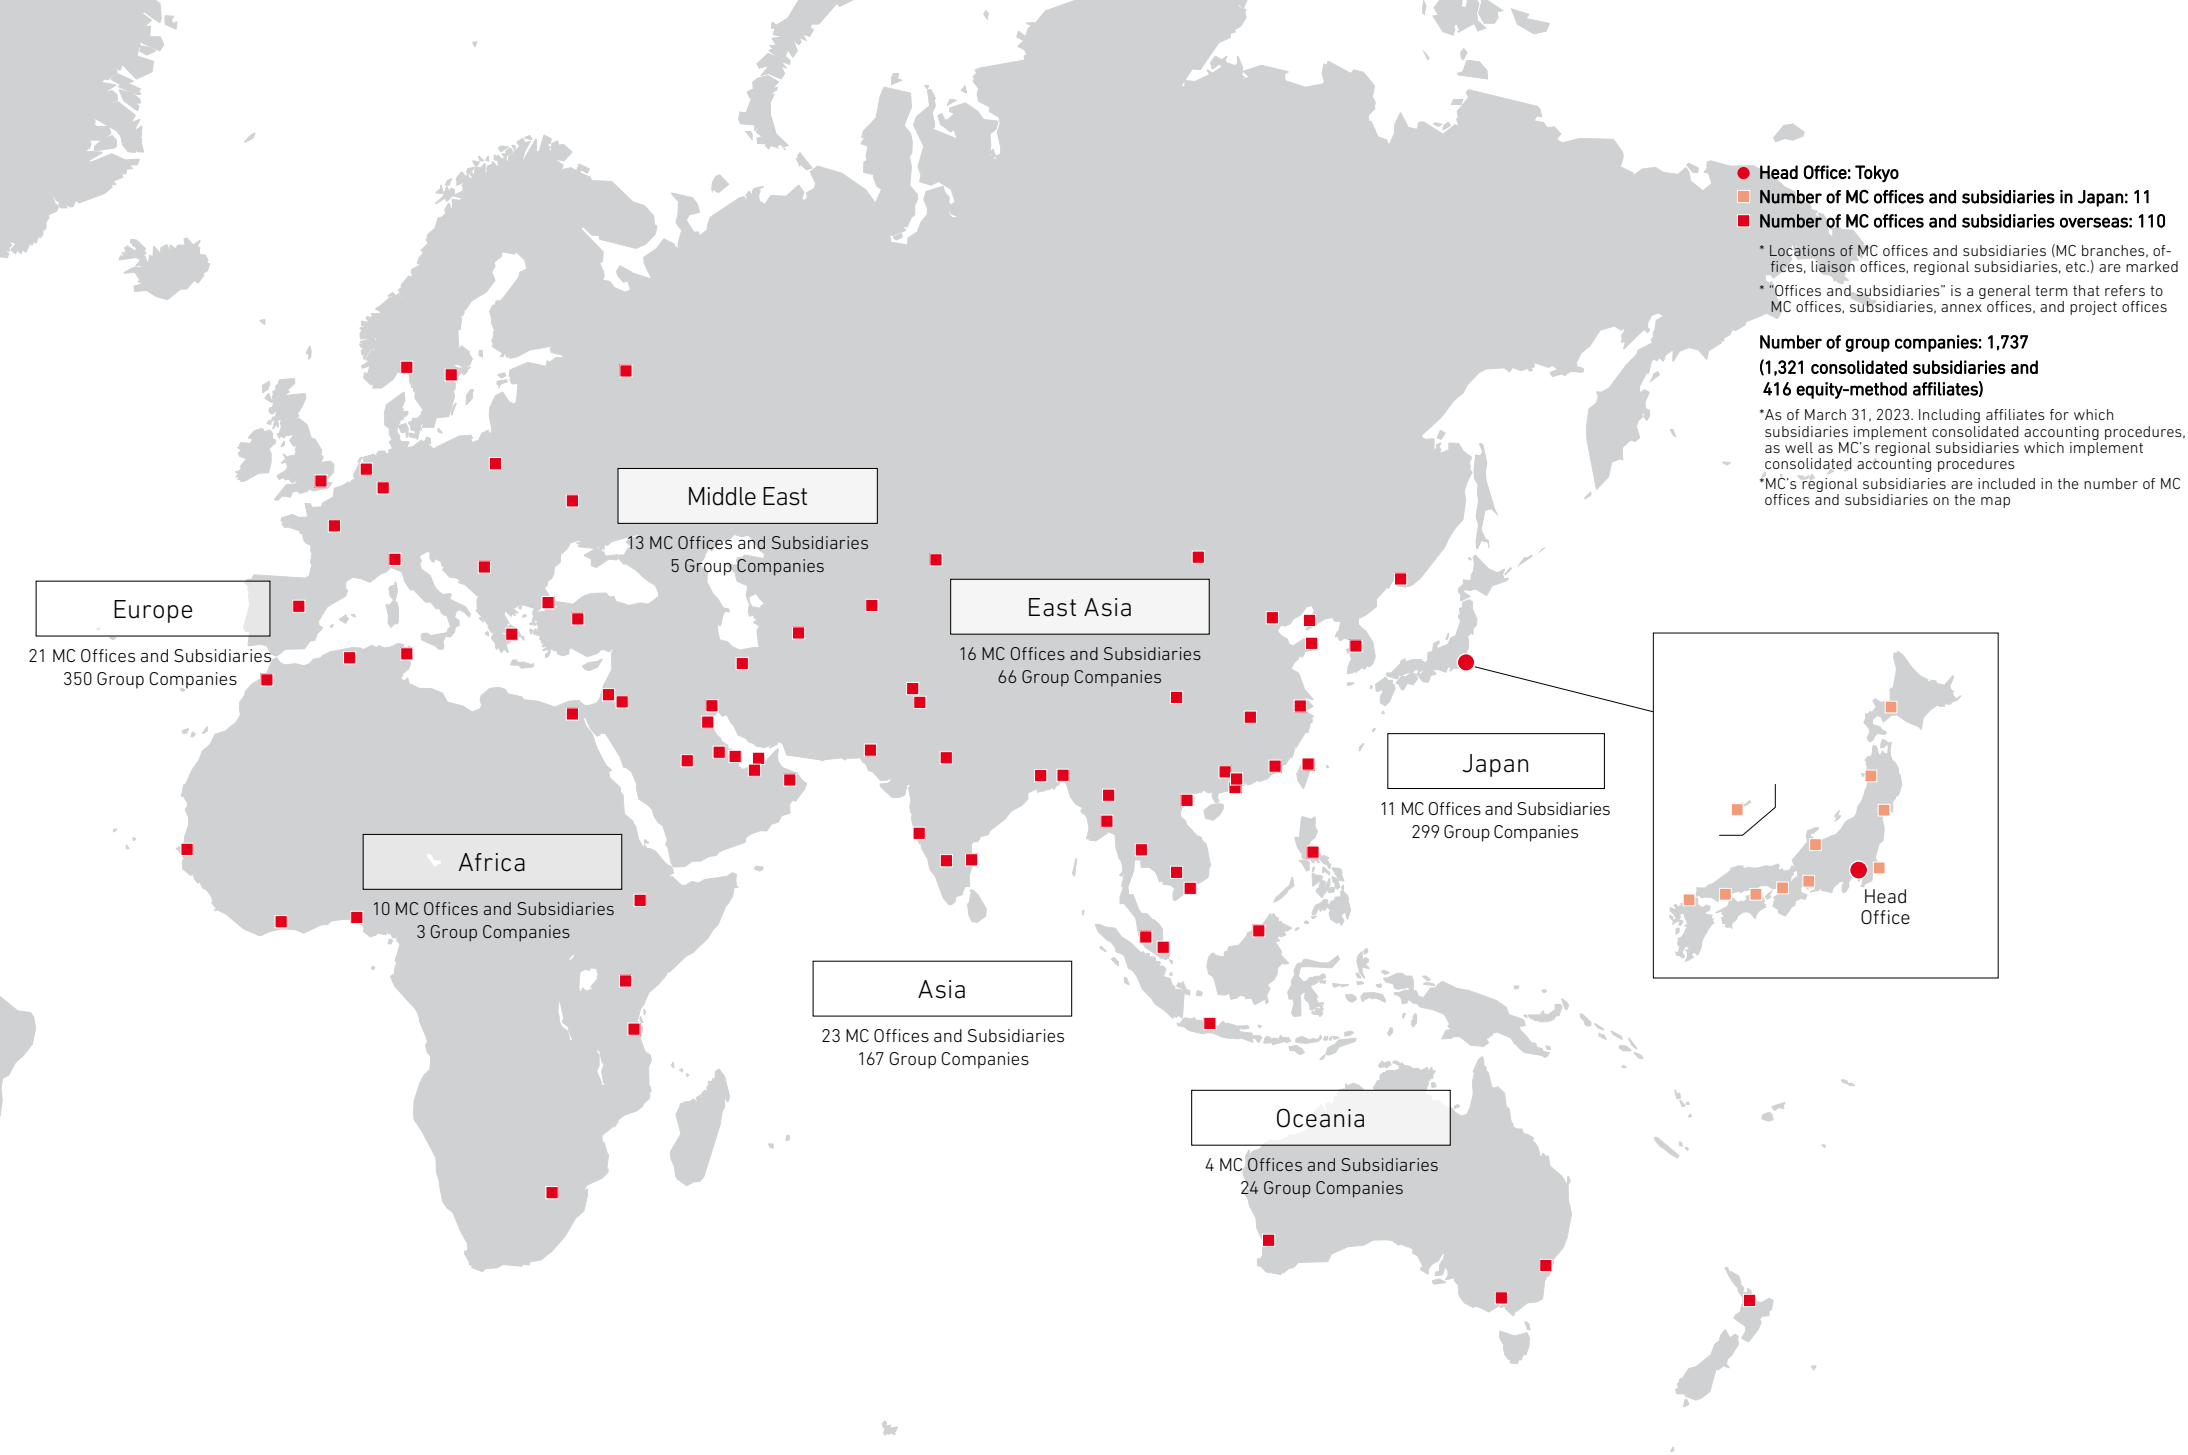

MC has long contributed to the development of societies and economies by working with its customers and partners all over the world to develop a wide range of businesses that it could not have realized on its own. These positive relationships are built upon day by day as irreplaceable assets spanning the past, present and future.

In this manner, the MC Group aims to maximize its corporate value by enhancing its global network and by fully leveraging its collective abilities, including its solid relationships with customers and partners around the world.

Organizational Structure (As of April 1, 2023)

*Organizational Structure of the head office

Roadmap to a Carbon Neutral Society

(Established in October 2021)

There is an urgent need for decarbonization initiatives in response to global climate change. The MC Group will continue to fulfill its responsibility as an active player in industries including resources and energy by continuing to provide a stable supply of energy, such as natural gas, while working to achieve a carbon neutral society.

Greenhouse Gas Reduction Targets
Halve by FY2030, Net Zero by 2050
(FY2020 baseline)

By FY2030
Approx. 2 trillion yen of EX-related investment
(Energy Transformation)

Integrated EX/DX initiatives to “Create a New Future”

Greenhouse Gas Reduction Targets

Net zero greenhouse gas (GHG) emissions by 2050, and a new FY2030 target with a detailed reduction plan. Emissions halved by FY2030 through portfolio replacement driven predominantly by divestment of thermal power assets.

Greenhouse Gas Reduction Targets **Halve by FY2030** (FY2020 baseline)

We will utilize every means available, aiming to reduce total emissions to a level consistent with the Paris Agreement, including by replacing assets and by switching operations to renewable energy and alternative fuels.

Greenhouse Gas Reduction Targets **Net Zero by 2050**

We aim to achieve a Paris-aligned target of net zero by 2050 by leveraging our collective capabilities to drive industrial transformation, as well as by embracing new technologies and innovation.

^{*1} The above figures represent the Scope 1 and Scope 2 emissions of MC and its consolidated companies, including affiliates, based on the equity share approach (for details, refer to <https://mitsubishicorp.disclosure-site/en/themes/113#977>).

^{*2} FY2020 is set as the new baseline, as it provides the most accurate affiliate data that was previously unavailable, e.g. Scope 2 market-based method emissions.

The data are currently under detailed examination and may be subject to minor revisions.

^{*3} Any residual emissions, after reduction efforts have been made, will be neutralized using internationally-accepted offsetting methods including carbon removal.

● Management and disclosure of Scope 3 emissions of particularly large emission categories, including those of affiliated companies' emissions as described in ^{*1} above, will be considered in tandem with future international debate and frameworks.

● The specific reduction plan and measures for the GHG emissions reduction targets will be adjusted as required in line with progress of technological developments, economic viability and policy/institutional support.

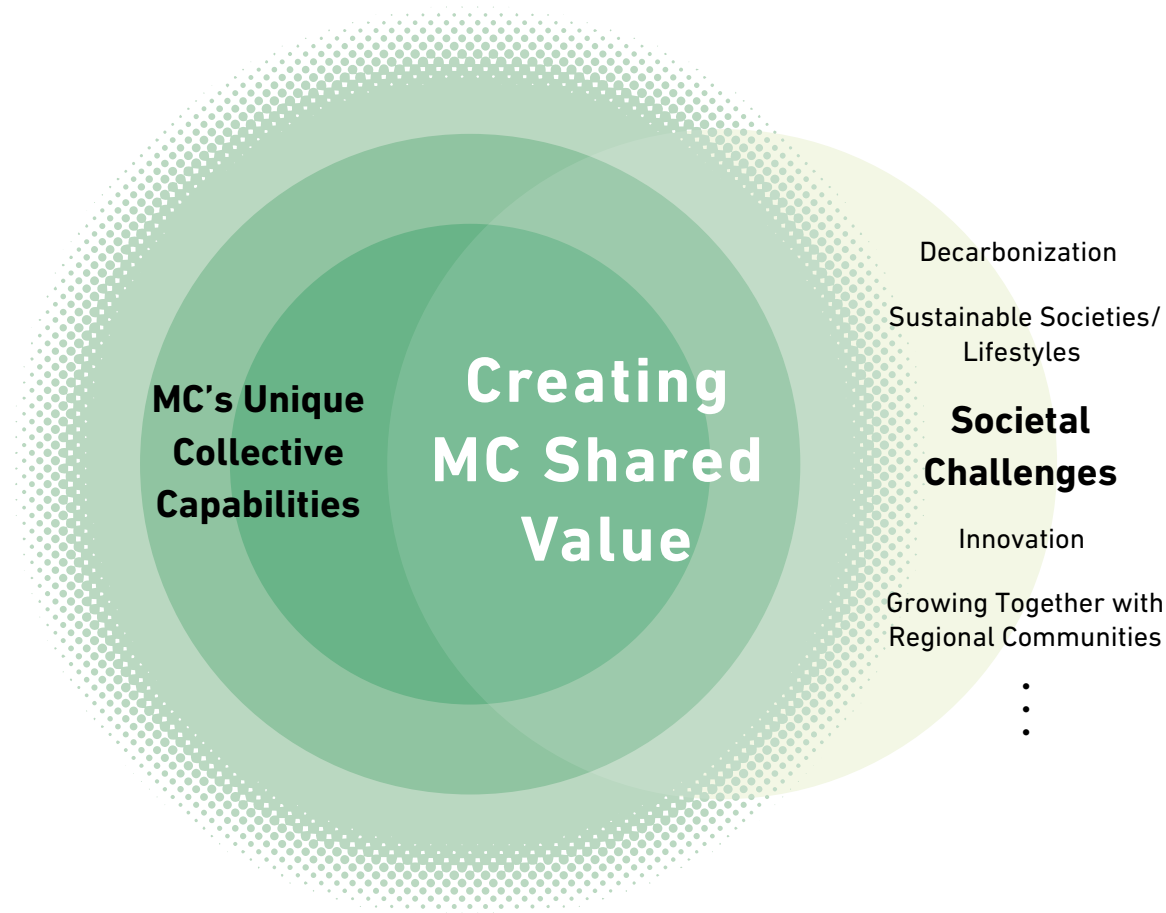

Midterm Corporate Strategy 2024 – Creating MC Shared Value

(Announced in May 2022)

Our Goals Under Midterm Corporate Strategy 2024

What Is MCSV?

The continuous creation of significant shared value by elevating MC Group's collective capabilities in order to address societal challenges.

We will fulfill our mission of simultaneously generating **economic, societal, and environmental value** through our business activities as we respond to the needs of all our stakeholders, while continuously returning to **the Three Corporate Principles**, which have guided MC's corporate philosophy since its founding.

Click here for details

<https://www.mitsubishicorp.com/jp/en/about/plan/>

Quantitative Targets / Shareholder Returns

We will achieve steady growth of earnings independent of market factors and continue to realize shareholder returns through progressive dividends and flexible company share buybacks. We will also strive to transform our business portfolio through investments into future growth, supported by cash flow management that is rooted in financial discipline.

*The listed information is current as of the announcement of MC's "Midterm Corporate Strategy 2024" (May 2022).

Quantitative Targets

Steady Growth of Earnings Independent of Market Factors

Consolidated Net Income

(Billion Yen)

Shareholder Returns

Balanced Policy of Financial Soundness, Stable Dividend Growth and Market Expectations on Shareholder Returns

Dividend per Share

(Yen)

Investment Plan / Business Portfolio

We have planned investments of 3 trillion yen during this midterm strategy period; with accelerated EX-related investments. At the same time, we will steadily promote investments in maintaining and expanding our earnings base as well as in DX/growth-related investment areas.

*The listed information is current as of the announcement of MC's "Midterm Corporate Strategy 2024" (May 2022).

Investment Plan for FY2022 – FY2024

Area	Scale of Investment	Major Investment Targets of Midterm Corporate Strategy 2024		
Maintain/ Expand Earnings Base	Approx. 1 Trillion Yen	Metallurgical Coal	Food	Automobiles, etc.
EX-related	Approx. 1.2 Trillion Yen	Copper	Natural Gas	
		Renewable Energy	Next-Generation Energy (Hydrogen/Ammonia/Biomass, etc.)	
		Battery Materials/Bauxite, etc.		
DX/Growth-related Investment	Approx. 0.8 Trillion Yen	Digital Infrastructure	Urban Management	
		Supply Chain Optimization	Urban Development, etc.	

FY2030

Cash Flow will be allocated to EX/DX and growth investments to support future growth.

**Acceleration of
EX Investment**

- MC's Roadmap to a Carbon Neutral Society includes plans for 2 trillion yen of investment in EX-related initiatives by FY2030.
- By accelerating EX-related investment, we will reinforce our business portfolio. We will also endeavor to simultaneously deliver decarbonization and a stable energy supply.

Business Portfolio

Balance of Investment

- Maintain/Expand Earnings Base
- EX-related
- DX/Growth-related

- Expand ratio of EX-related business portfolio from 30% to around 40% (end of FY2021~2024).
- Increase ratio to around 50% in the future.

EX Strategy

Aiming to Become a
Decarbonization Solution Provider

We will continue the promotion of low/zero carbon initiatives across the energy sector by connecting seeds (solutions) with needs related to EX Resources, Materials and Products. Moreover, we will provide solutions as EX Services while working closely with industry, consumers and regions to address emission reduction needs. The company-wide development and implementation of strategies is being carried out by the EX Task Force.

EX

Take on the challenge of **providing stable supplies of energy and resources** while **simultaneously supporting decarbonization efforts** of society and business.

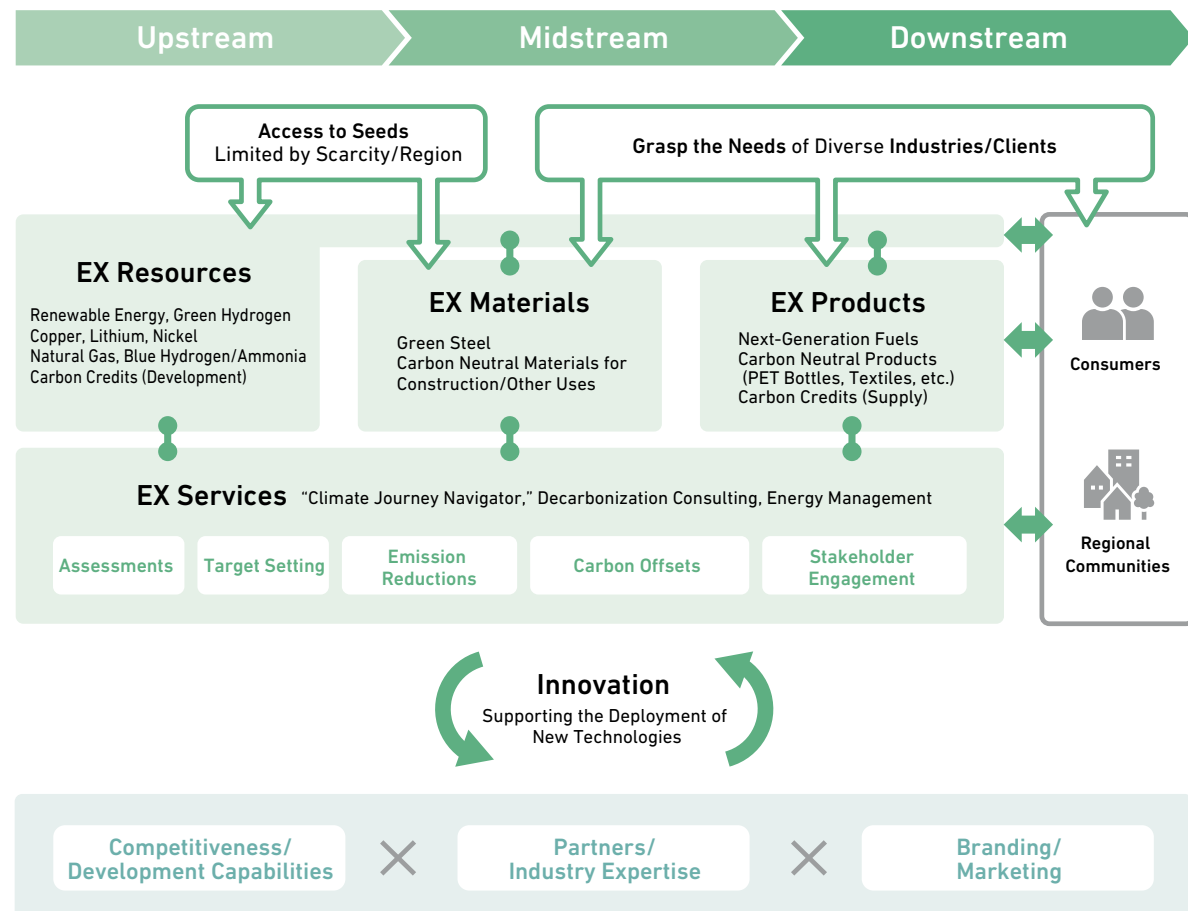

Efforts to enhance renewable energy businesses, mineral resources that underpin Electrification, and low/zero carbon energy.

Expand service-providing businesses by offering EX solutions in response to customer needs.

Leverage MC's far-reaching operations to appeal to consumers/regional communities by connecting seeds and needs.

Join with partners to support the transition to a carbon neutral society and improvements in industry competitiveness, while maintaining a holistic view of the EX value chain.

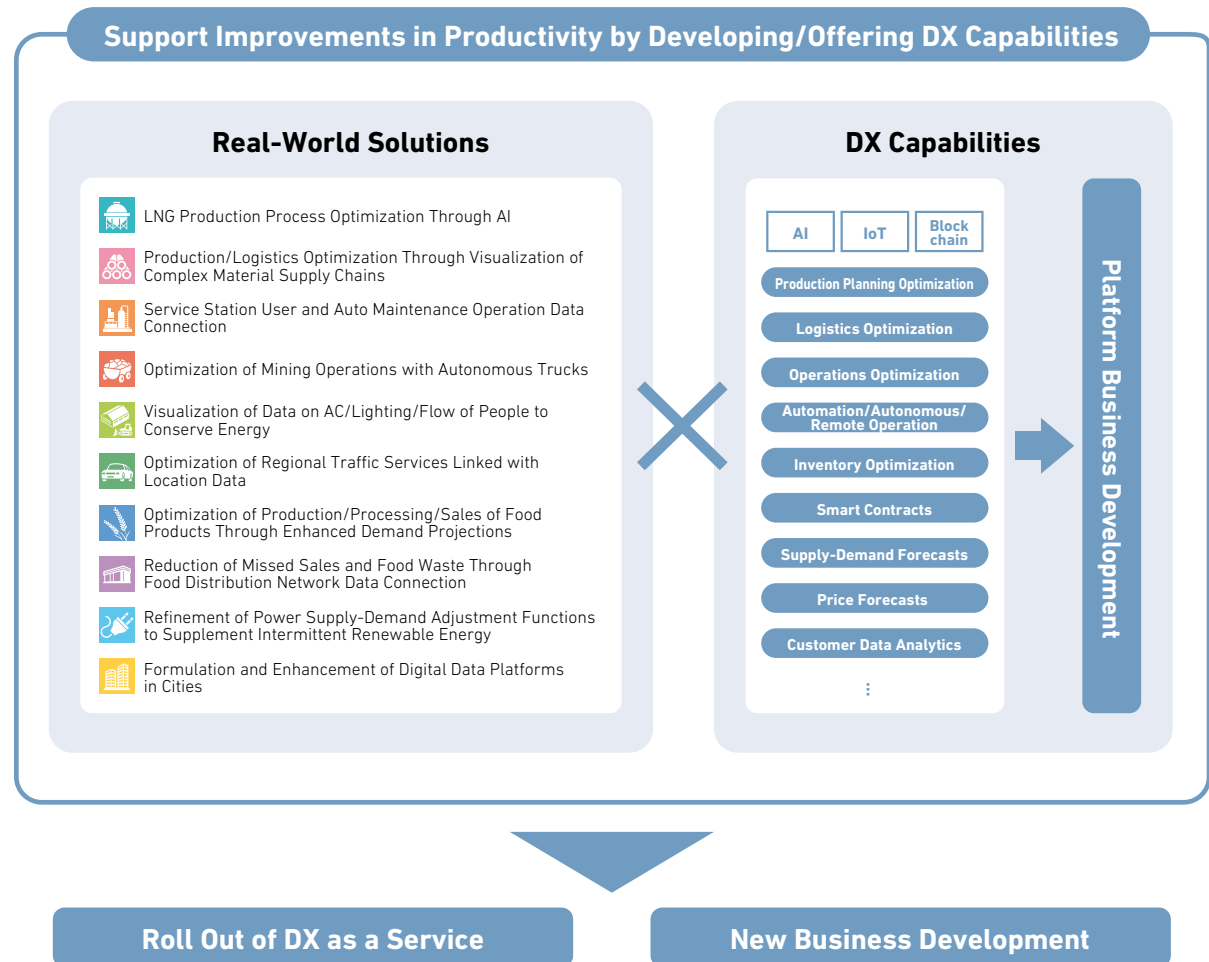

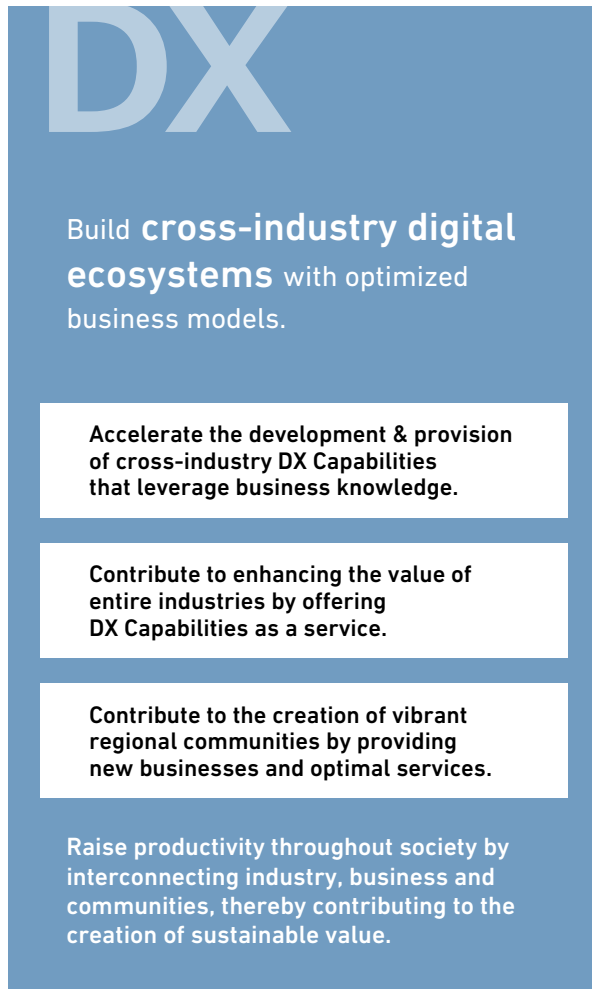

Aim to Become a Decarbonization Solution Provider

DX Strategy

Linking Digital Technologies with the Real World

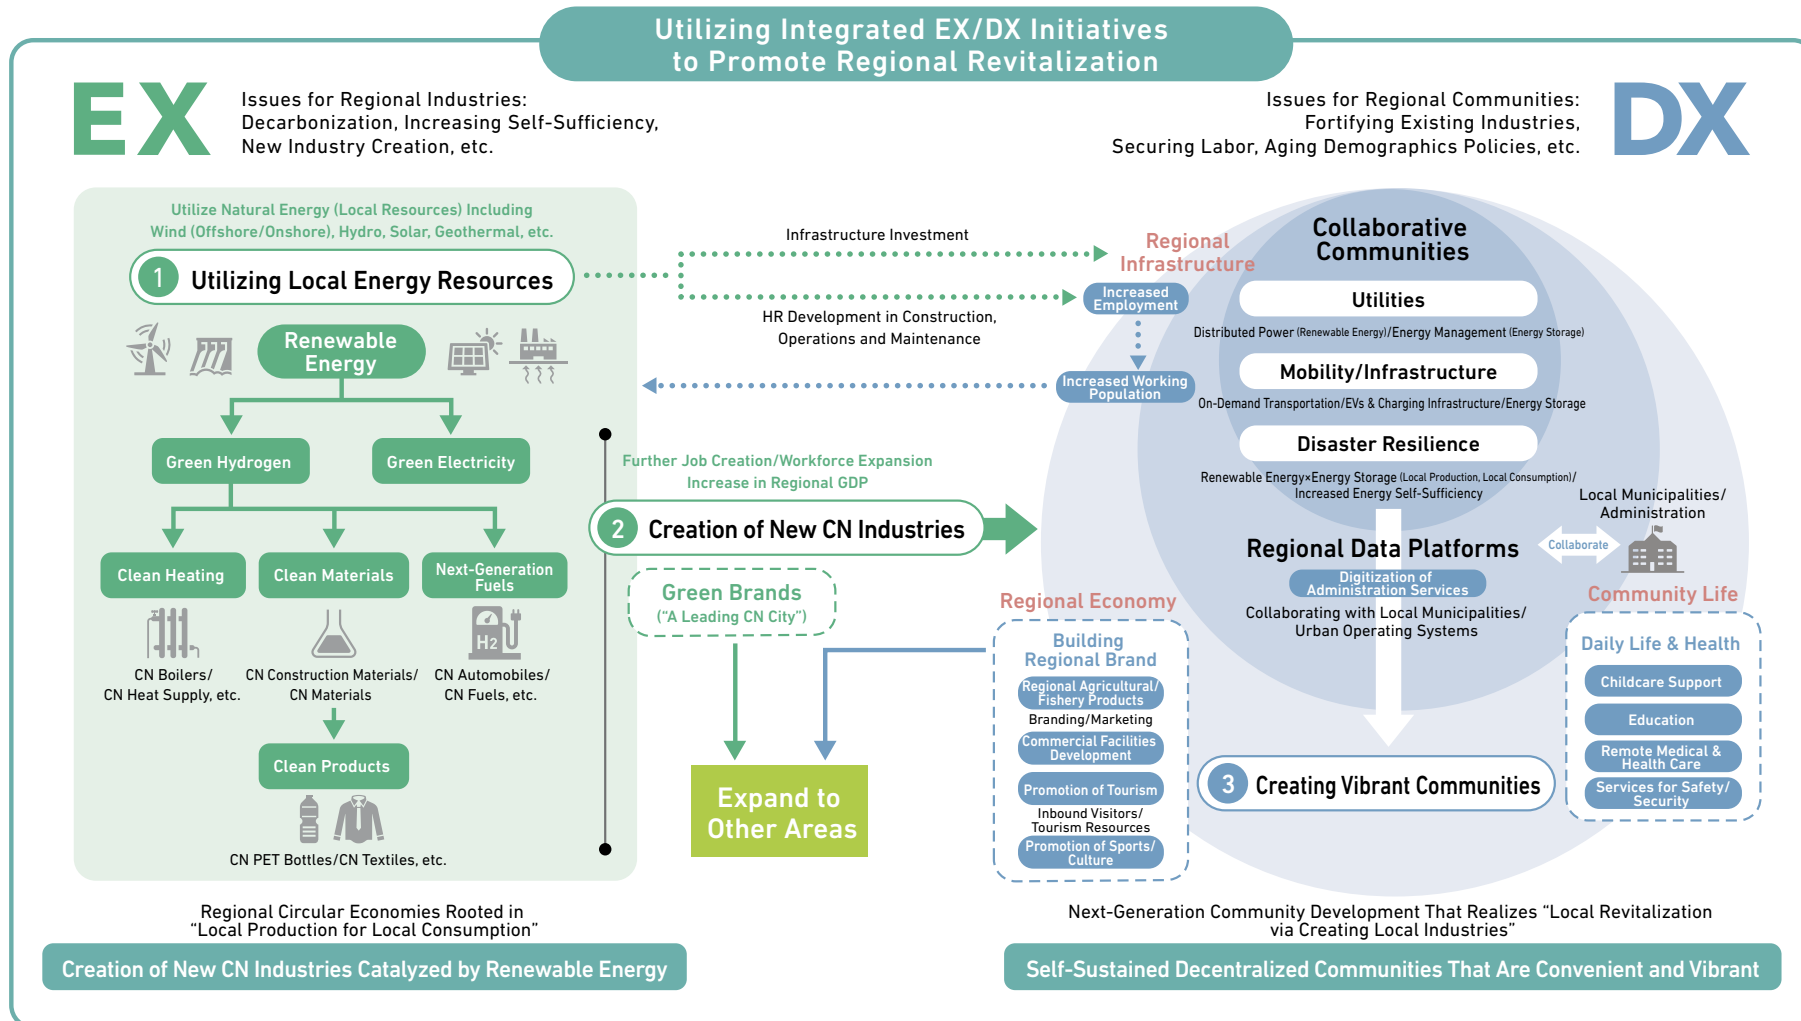

We will deploy MC's DX Capabilities across various business operations in order to promote value enhancement, targeting diverse, real-world businesses. Further, we will address societal challenges by linking digital technologies with real world needs, thereby contributing to the development of industry and a future society with vibrant communities.

Creating a New Future

Fostering New Industries/Regional Revitalization

We will continue to work with partners and local municipalities to address challenges facing society and industry on the themes of utilizing renewables and other local energy resources, thereby creating new "Carbon Neutral (CN)" industries, and developing vibrant communities by helping to resolve regional issues.

Industry Digital Transformation Group

Digital Business Development Dept.

Our aim is to expand business as a DX enabler while helping to promote the MC Group's DX initiatives and achieving results through the provision of DX functions. Based on these efforts, we will expand DX service businesses that lead to new business developments and investments, and enhance the value of entire industries. We will also contribute to solving social issues through the commercialization of next-generation technologies and cross-industry co-creation schemes.

Power & Community DX Dept.

Our department focuses on developing and offering retail services for consumers by generating synergy between the MC Group's products and networks. By combining real and digital solutions, we aim to add value by combining them with existing services such as electric power. We also strive to create self-sustained, decentralized communities that both solve regional issues and revitalize the local economy by providing community-based services.

The Industry Digital Transformation Group will take the lead in progressing MC's DX strategies, one of the main pillars of the growth strategies outlined in Midterm Corporate Strategy 2024. We aim to contribute to the development of industry and a future society with vibrant communities by leveraging the MC Group's broad industry expertise and DX capabilities, interconnecting industry/business/communities, and linking digital technologies with the real world to address societal challenges.

Our group will develop DX capabilities across a wide range of businesses and provide DX as a service together with the developed DX capabilities to contribute enhancing business value and productivity throughout society as a whole.

Industry Value Chain DX Dept.

Our aim is to develop solutions and services that help to solve business- and management-related challenges that industries and companies are facing, and to provide them as a platform. To achieve this, we will strive to promote collaboration with companies that have the necessary technologies through potential partnerships. As our primary targets, we will first focus on developing businesses in the fields of logistics, mobility, and data services.

Service Industry DX Dept.

The Service Industry DX Dept. develops business models using financial technology, as well as digital services for areas such as finance, healthcare and real estate using touch points with local governments and residents. We collaborate extensively with partners both within and outside the MC Group as we aim to realize businesses that will become pillars for the future growth of the MC Group.

DX Consulting & DX Platform/Solution Business (Japan)

Industry One

Spearheading the Social Implementation of DX

Industry One is the core company of MC's digital business. It was established in 2021 with the goal of spearheading the social implementation of industrial digital transformation (DX). Industry One leverages MC's global and industry knowledge and contacts across multiple sectors, as well as the advanced digital technologies of its partner companies, to provide comprehensive support that covers everything from laying the foundation for DX, such as digital strategy planning, to system development and digital business creation utilizing advanced technologies. Industry One will continue to promote DX to not only shore up MC Group companies, but to also help resolve industrial and societal issues.

Digital Transformation Strategy Planning, Application & Digital Platform Development Using Cutting-Edge Technology such as AI and Data Science (Japan)

MC Digital

Solving Problems with Cutting-Edge Technology

MC Digital's mission is to update business models by leveraging technology, and the company will utilize AI and other cutting-edge technology to solve issues in the industries that MC conducts business in. MC Digital will also collaborate with overseas innovation ecosystems, as well as academic and administrative institutions, while striving to develop new businesses and provide solutions for various fields.

IT Consulting, Business Solution/System Development, Maintenance & Operation Business (China)

iVision Shanghai Co., Ltd.

Providing ICT Services to Japanese Companies in China

As the MC Group's only IT company in China, iVision Shanghai provides comprehensive IT services to over 200 Japanese enterprises in China. The scope of iVision Shanghai's business includes IT consulting, system construction and IT infrastructure, among others. At present, the company is particularly focusing efforts into DX application services that provide promotional support for the retail industry and improve efficiency for the manufacturing industry. iVision Shanghai will grow together with its customers based on the principle that "customer growth is our growth."

Cloud System Services for the Construction Industry, Businesses Utilizing Big Data, etc. (Japan)

MC Data Plus

Providing Vertical SaaS Solutions to Resolve Social Issues

With the mission of "connecting companies and people with data and services," MC Data Plus promotes the creation of digital platforms by providing Vertical SaaS for solving social issues in various fields. The company produces new "real" and "digital" businesses by utilizing big data collected from these digital platforms. SaaS for the construction industry, which is the company's core business, is contributing to the sector as one of the largest digital platforms in the industry, and efforts are also being made to develop SaaS for the retail industry.

General Lifestyle Services Provider (Japan)

Chubu Electric Power Miraiz Connect

Providing Services that Cultivate Family Bonds & Connections

Chubu Electric Power Miraiz Connect is a joint venture between Chubu Electric Power Miraiz and MC that carries out the development and sales of services pertaining to day-to-day life, with themes such as elderly monitoring, childcare support, food and health, etc. With the concept of "developing lifelong customer connections," Chubu Electric Power Miraiz Connect will provide services that meet the various needs of customers' daily lives and life events by utilizing the connections with customers cultivated through Chubu Electric Power Miraiz's energy supply services thus far, and the network and digital technologies held by MC in a wide range of industries and service fields.

Home Repairs and Improvements Service (Japan)

HomeServe Japan

Providing a Subscription-Based One Stop Service for Home Repairs and Improvements that Makes the Process Easy by Matching Customers with Trades

HomeServe Japan is a joint venture company established in 2019 and owned by MC and HomeServe International, whose head office is located in the UK. Its business provides Japanese residents with a subscription-based emergency and repair services in areas such as electrical equipment, plumbing, gas, heating, ventilation and air conditioning through its partnerships with utility companies and municipalities in Japan under the vision of "making a subscription-based home repairs and improvements service common throughout Japan while eliminating house-related anxiety and bringing a sense of well-being to residents."

Next-Generation Energy Business Group

LPG & Petroleum Feedstock Business Dept.

Works to ensure a stable supply of energy and petrochemical feedstock while also promoting low/zero carbon initiatives through businesses and transactions related to LPG, naphtha and crude oil.

New Power Generation Fuels Business Dept.

Aims for social implementation of fuel ammonia by constructing large-scale and stable supply chains.

Biofuels & E-fuel Business Dept.

Works to decarbonize fuels through the development of next-generation fuels for transportation, including synthetic fuels derived from hydrogen and biofuels.

Refinery Business Dept.

Leverages petroleum products businesses to promote initiatives that improve convenience and solve industrial issues to help with the transition to a carbon-neutral society.

The Next-Generation Energy Business Group is responsible for discovering and developing low-carbon/carbon-free technologies and building supply chains for next-generation energy in order to promote Energy Transformation (EX) initiatives, which is one of the main pillars of MC's growth strategy in its Midterm Corporate Strategy 2024.

In order to provide stable supplies of energy and resources while simultaneously supporting decarbonization efforts of society and businesses, we will help realize a carbon-neutral society by promoting a broad range of initiatives in EX-related value chains while leveraging MC's broad industrial network as a *sogo shosha*.

Hydrogen Infrastructure Development Dept.

Aims to realize low-carbon and carbon-free societies through hydrogen supply chain related infrastructure investments that are essential to hydrogen society, as well as investments to hydrogen transportation technologies.

Hydrogen Business Development Office

This office not only works to develop businesses related to clean hydrogen, but can also utilize existing infrastructures to develop e-methane, which has the potential to curb social costs.

Carbon Management Office

Works on developing businesses related to carbon management and carbon credits, which are required to realize a carbon-neutral society.

New Technologies Office

Invests in startups with promising technologies, which will be necessary for realizing low-carbon and carbon-free societies, and leverages new technologies to create business opportunities.

Hydrogen-related Venture Investments (UK)

AP Ventures

Investing in One of the World's Leading Venture Capital Firms

Through AP Ventures, a hydrogen-related UK venture capital firm, we are identifying direct investment opportunities in startups that have promising technologies necessary to develop the hydrogen society in the future. So far, we've invested in Hydrogenious, a German company with hydrogen storage and transportation technology, in hystar, a Norwegian company with water electrolysis technology, which is essential for green hydrogen production, and in Amogy, a US company with ammonia cracking technology. We will strive to utilize new technologies to further create business opportunities going forward.

e-methane (Synthetic Methane) Development Project (USA)

e-methane Development Project Utilizing the Cameron LNG Terminal in the US

In order to decarbonize heat demand, which accounts for about 60% of the consumer and industrial sectors, it is expected that "e-methane" (synthetic methane), which can utilize existing gas infrastructure and curb additional social costs, will be introduced into the global energy mix. MC is conducting detailed joint studies with partners to establish a supply chain, and is aiming to produce e-methane from raw materials such as hydrogen, CO₂, and water in order to realize export into Japan by 2030.

Fuel Ammonia Project

(USA, Canada, Indonesia, etc.)

Social Implementation of Next-Generation Fuel

As one approach to achieving a carbon-neutral society, we are aiming for social implementation of using ammonia as a fuel. Ammonia is attracting attention as a next-generation fuel source that does not emit CO₂ when burned. Together with our partners, we are developing projects around the world to construct large-scale and stable fuel ammonia supply chains.

Petroleum Product Sales Business (Japan)

Mitsubishi Corporation Energy Co., Ltd.

Providing a Stable Supply of Oil

Mitsubishi Corporation Energy (MCE) was established on October 1, 2015, with the objective of bringing together and augmenting the management resources for Japan-based petroleum product sales. While providing a stable supply of petroleum products such as gasoline, kerosene, gas oil, fuel oil and asphalt, MCE is also promoting new DX businesses utilizing its retail networks, including e-commerce businesses through its subsidiary, Car Frontier.

LPG Import & Sales Business (Japan)

Astomos Energy Corporation

One of the World's Largest LPG Players

MC Group company Mitsubishi Liquefied Petroleum Gas Co. and Idemitsu Kosan Group company Idemitsu Gas and Life Co., Ltd. came together to form Astomos Energy Corporation in 2006. Astomos is among the world's largest enterprises specializing in LPG, and handles approximately 25% of Japan's demand for the fuel. The company is also engaged in electricity retailing and promoting greater proliferation of residential fuel cells and high-efficiency water boilers.

Hydrogen Supply Chain Business

(Singapore, Europe, Japan)

Developing an International Hydrogen Supply Chain Using SPERA Hydrogen™ Technology

SPERA Hydrogen technology developed by Chiyoda Corporation is a key technology that enables the safe and efficient long-distance transportation and storage of hydrogen, a product that is attracting attention as a source of clean, next-generation energy. In order to provide a stable supply of hydrogen to Singapore, Europe, Japan and other countries where hydrogen demand is expected to grow in the near future, MC is accelerating technical and commercial development toward the realization of an international hydrogen supply chain.

Natural Gas Development and Production Project (Canada)

Montney / Shale Gas Development

Shale Gas Development and Production in Canada

MC, in partnership with Oviniv, is actively engaged in shale gas development at a premier unconventional resource play in Montney, an area well recognized for its massive remaining resources. MC will export the gas produced at Montney to markets in East Asia including Japan, through the LNG Canada project in which MC also participates, in addition to marketing the gas locally in North America.

Refining & Sale of Natural Gas (Iraq)

Basrah Gas Company

Iraq's First Project for Effectively Utilizing Associated Gas

Basrah Gas Company refines and sells natural gas in Iraq. Three enterprises have invested in the company, namely MC, South Gas Company and Shell. Since 2013, Basrah Gas Company has been collecting and refining associated gas, as well as selling gas for power generation, LPG and condensates. Basrah Gas Company is providing the country with a stable supply of energy, helping to protect the global environment by collecting associated gas, which was conventionally flared on-site, and supporting the local economy by creating jobs.

■ **LNG Canada**
(Canada)

■ **CIMA ENERGY, LP.**
Oil and Gas Marketing (USA)

LNG Liquefaction & Sales Business (USA)

Cameron LNG

US-Based Natural Gas Liquefaction and Export

Cameron LNG is a project where natural gas produced in the US is liquefied and exported. The project, which has a capacity to commercially produce 12 million tons of LNG per year, a third of which is handled by MC, started commercial operations in August 2019. Supply from Cameron LNG supplements LNG sources in Southeast Asia and the Middle East, contributing towards a stable supply of energy.

■ **Garraf** Crude Oil Production (Iraq)

■ **Qalhat LNG** (Oman)

■ **Oman LNG**
(Oman)

■ **Diamond Gas International** LNG Sales (Singapore)

■ **Brunei LNG**
(Brunei)

Malaysia LNG (Malaysia)

■ **Browse LNG** (Australia)

■ **Wheatstone LNG**
(Australia)

■ **North West Shelf (NWS)** (Australia)

Natural Gas Group

The Natural Gas Group develops its energy business towards achieving a carbon-neutral society while fulfilling its responsibility as a stable energy supplier.

With its comparatively lower environmental impact, natural gas/LNG is a key energy source in the transition period to a carbon-neutral society; as a balancing source for renewable intermittency, as a replacement for coal and oil, as an energy source for the hard-to-abate sectors, and as a feedstock for next-generation energy.

Through our LNG facilities in North America, Southeast Asia, Australia and other regions around the globe, as well as the marketing activities, etc., of our subsidiary in Singapore, MC provides a stable supply of energy while helping to address environmental challenges such as climate change and air pollution.

Furthermore, in an aim to secure supplies of cleaner energy to meet the evolving needs of customers and as part of our efforts to achieve a carbon-neutral society, we are also focusing our attention on carbon capture and storage (CCS), development of carbon credits, and other solutions which are expected to be promising methods for reducing CO₂ emissions.

LNG Liquefaction & Sales Business (Indonesia)

Donggi-Senoro LNG

First All-Asia LNG Project

The Donggi-Senoro (DSLNG) Project is the world's first LNG project to be undertaken exclusively by Asian companies, and without the involvement of major oil and gas companies. Companies from Japan, Indonesia and South Korea are taking part in the project. As the largest shareholder, MC assumes the leading role in this project, from which production and sales of LNG and associated condensate have been underway since 2015.

■ Tangguh LNG (Indonesia)

Plastics Additives and PVC Stabilizers Business (USA)

Amfine Chemical Corporation

Manufacturing and Sales of Essential Materials for Automotive Lightening and Material Circulation

Manufactures and sells functional materials (plastics additives) to add various properties such as durability and flame resistance to plastics. Amfine Chemical Corporation is a joint venture between MC and ADEKA, a leading company in this field.

Needle Coke Business (South Korea)

POSCO MC MATERIALS

Stable Supply of Essential Materials for Electric Arc Furnace

Manufactures and sells needle coke, the raw material used for graphite electrodes, which are indispensable for the operation of electric furnaces (steel product recycling), a market that is expected to grow in the future. The company is a joint venture between Mitsubishi Chemical, MC and POSCO FUTURE M, a subsidiary of South Korea's largest steel company, POSCO.

Riken Americas Corporation

Manufacturing and Sales of PVC and Thermoplastic Elastomer Compounds (USA)

Cement & Ready-mix Concrete Business (USA)

Mitsubishi Cement Corporation / MCC Development Corporation

Stable Supply of Essential Materials for Construction and Infrastructure Development

A joint venture between Mitsubishi UBE Cement Corporation and MC that develops the integrated manufacturing and sales of cement and ready-mix concrete in California, US, as well as other regions. With the aim of reducing CO₂ emissions, the company is also working to introduce CCU technology that utilizes ready-mix concrete and other materials.

Silica Sand Business (Australia)

Cape Flattery Silica Mines Pty., Ltd.

One of the World's Largest Silica Sand Suppliers

A wholly owned subsidiary of MC that owns one of the world's largest silica sand mines located in Australia. For over 50 years the company has supplied silica sand, which is the raw material used for various products such as flat glass and display glass, to Japan and other Asian countries where demand has grown remarkably.

Steel Business (Japan)

Metal One Corporation

Leading Company in Steel Products Value Chain

Metal One Corporation (Metal One), established in 2003, is a company jointly owned by MC and Nissho Iwai Corporation (now Sojitz Corporation). With over 140 subsidiaries and affiliated companies around the world, Metal One has forged a value chain connecting steel manufacturers and customers by providing integrated services including distribution, inventory, processing and manufacturing, as well as sales of steel products.

■ **Nippon Electrode Co., Ltd.**
Manufacturing and Sales of Various Carbon Products (Japan)

■ **Mitsubishi Shoji Construction Materials Corporation**
Sales of Construction & Ceramic Materials (Japan)

■ **Frontier Carbon Corporation**
Production & Sales of Fullerenes (Japan)

Manufacturing and Sales of Functional Materials (Japan)

Toyobo MC Corporation

Manufacturing and Sales of Functional Materials Contributing to a Sustainable Society

Toyobo MC develops, manufactures, and sells functional materials (engineering plastics, coating and adhesive raw materials, etc.) that help to not only promote weight reduction and electrification in the mobility sector, but also respond to environmental issues. The company is a joint venture between MC and Toyobo, a high-performance materials manufacturer with advanced technology.

Consulting and Engineering Services Provider for the Materials Industry (Japan)

Beyond Materials Corporation

New Consulting Services Connecting Users' Needs with the Materials Industry

A joint venture between MC and a group company of the FEV Group, a major German engineering service provider with user knowledge in the automotive industry and other sectors. The company provides market research, strategy planning and execution support, product development and demonstration testing support, as well as digital solution services for the materials industry.

Industrial Materials Group

The Industrial Materials Group conducts various activities to help realize a carbon-neutral society. These include efforts such as strengthening our functional materials business, which underpins the digitization and electrification of society, and the proliferation of more lightweight solutions and electric vehicles (EVs) in the automotive and mobility sectors, enhancing our silica sand business which provides the raw materials used for solar power generation panels, and engaging in carbon capture and utilization (CCU) initiatives in the fields of construction and infrastructure.

In addition, by combining digital technology with real businesses essential to material distribution, we will strive to address the issue of labor shortages and surplus costs caused by complex distribution structures and work processes. At the same time, we will also utilize our existing businesses, industrial knowledge, and global network to reconfigure the materials industry from a conventional one-way economic model of mass production and consumption to a circular economy model as we take on the challenge of transforming the materials industry, which plays an important role in realizing a sustainable society.

Mineral Resources Group

The Mineral Resources Group has grown its business model by addressing evolving demands from stakeholders and the broader society, as well as changes in the business environment. Today, we have a portfolio of prime assets with world-class cost competitiveness and quality, such as metallurgical coal and copper.

Metals and minerals, including steel and copper, are crucial in our world today even as we are faced with key challenges such as identifying opportunities for decarbonization, electrification, and building circular economies. We will continue to fulfill our mission by sourcing these resources to the market through trading, resource investments and business development.

Automotive & Mobility Group

The Automotive & Mobility Group has developed a global value chain spanning the production, sales, distribution, financing and after-sales services of passenger and commercial vehicles, with a focus on the ASEAN region.

To date, we have developed our business in tandem with the expansion of Japanese car manufacturers into overseas markets, and one of our missions, particularly in the field of sales, has been to grasp highly-localized customer needs and reflect them in product specifications, quality improvements and after-sales services to enhance product appeal and brand loyalty.

We are also seizing opportunities around the shifts towards digitization and CASE (Connected, Autonomous, Shared/Service and Electric), strengthening our businesses anchored on long-developed functions and extensive local networks, as well as addressing societal needs by spearheading new mobility service solutions to support the efficient movement of passengers and cargo.

In addition, we aim to contribute to the realization of a decarbonized, sustainable, and energy-efficient society through the proliferation of electric vehicles and storage batteries.

Diamond Generating Corporation (DGC) (USA)

Developing Power Businesses in the Americas

DGC was founded in 1999 to oversee MC's electric power businesses in the Americas, such as power generation, distributed power generation and energy trading. DGC focuses on developing and promoting renewable energy to help realize a decarbonized society, and as of late March 2023, DGC holds approximately 2,900MW of power generation assets on an equity basis.

Boston Energy Trading and Marketing LLC
Energy Trading & Marketing Business (USA)

Nexamp, Inc.
Distributed Solar Power Business (USA)

N.V. Eneco (Netherlands)

Developing Integrated Energy Businesses in Europe

With a focus on the Netherlands, Belgium and Germany, Eneco is developing its power generation business, with renewable energy at its core, as well as its electricity / gas trading, electricity / gas retail and district heating supply businesses.

Diamond Generating Asia, Limited (DGA)

(Hong Kong)

Developing Power Businesses in Asia, Oceania and the Middle East

Established in 2009, DGA serves as a base for MC's electric power businesses in Southeast Asia, Oceania and the Middle East. The company aims to expand its power generation business in the region, which is showing steady signs of growth in demand for electricity. As of late March 2023, DGA holds approximately 1,480 MW of power generation assets on an equity basis.

Diamond Transmission Corporation Limited (DTC)
Power Transmission Business (UK)

Bboxx Limited Distributed Power Supply Business (UK)

OVO Group Limited Electricity and Gas Retail Business (UK)

ElectroRoute Holdings Limited (Ireland)

Energy trading and service business in Europe and Japan

ElectroRoute engages in spot, futures, international and other forms of trade in the liberalized European energy market. The company functions as a comprehensive service provider, offering energy-trade support to power producers, consumers and retailers. ElectroRoute is also expanding its operations in Japan, where deregulation of the power market is progressing.

Aguas CAP
Water Business (Chile)

Metito Holdings Limited
Water Business (UAE)

Umm Al Houl Power Company (Qatar)

Commencement of Gas-Fired Power Generation & Desalination Project in Qatar

The gas-fired power generation and desalination project in Qatar began commercial operation in 2018, and is scheduled to provide the country with electricity and water for 25 years. This project will help MC provide Qatar with a stable supply of electricity and water, and shore up MC's efforts in its global power generation and fresh water businesses in response to growing demand around the globe.

Mitsubishi Corporation Energy Solutions Ltd. (Japan)

Developing power generation business in Japan

Mitsubishi Corporation Energy Solutions mainly strives to develop and manage its power generation business in Japan, which as of late March 2023, holds approximately 1,090 MW of power generation assets on an equity basis.

The company will continue to develop its power generation business, centering around renewable energy with the aim of realizing a decarbonized society, while also providing solutions for energy cost reductions and decarbonization to customers, with a focus on industrial consumers.

Mitsubishi Corporation Clean Energy Ltd.
Renewable Energy Business, etc. (Japan)

Mitsubishi Corporation Offshore Wind Ltd.
Offshore Wind Power Generation Business (Japan)

■ MC Retail Energy Co., Ltd. (Machi-Ene) Power Retail Business (Japan)

Swing Corporation (Japan)

General Water Business Company

Swing has long-standing experience developing technologies and products, as well as providing services as a pioneer of water infrastructure in Japan. It is broadly developing businesses to meet a wide range of water needs, covering everything from research and development, design and construction through to maintenance management and business operations.

Power Solution Group

The Power Solution Group consists of two divisions and two offices, namely the International Power Division, the Utility Retail Division, the Eneco* Office and the Domestic Power Business Office. We conduct a variety of initiatives including water businesses to meet diversifying utility needs, with a focus on our power solution value chain business which functions to “generate” renewable energy, “integrate” weather-dependent electricity (through a sophisticated balance of supply and demand), as well as “deliver” electricity and high added-value services to our customers.

Some of our main initiatives include our renewable energy business that contributes significantly to the decarbonization of society, the construction of distributed power generation infrastructure based on the concept of local production for local consumption, as well as power trading businesses such as spot transactions and futures trading in the power market.

By combining low-emission power sources, such as renewable energy, with digital technologies, we not only contribute to the stable supply of electricity, but also provide new added value to customers, such as supply and demand adjustment. We are also conducting initiatives in the field of hydrogen, which is expected to play a role as next-generation fuel. Through these efforts, we aim to contribute to the realization of a sustainable low-carbon/ decarbonized society while raising our corporate value.

* Eneco is an integrated energy company based in the Netherlands

International Power Div.

● Strategy & Planning Office ■ International Utility Dept.

Overseas power generation & transmission business, power trading business, overseas distributed power supply business, overseas water business, hydrogen business

Utility Retail Div.

Portfolio Company: Food and Miscellaneous Goods Company

Urban Development Group

The Urban Development Group promotes highly functional and attractive urban development projects which demonstrate the comprehensive capabilities of the MC Group. Under its vision of creating cities, societies and the future, the Urban Development Group promotes businesses through three divisions: Urban Development & Infrastructure, Global Urban Development and Financial Business.

The Urban Development & Infrastructure Division engages in the development and management of urban development projects and real estate development projects such as logistics facilities, commercial facilities and residential properties in Japan, as well as infrastructure projects including data centers and airports, key facilities that form the foundation of urban infrastructure.

The Global Urban Development Division is engaged in urban development and urban management projects that offer convenience and environmental friendliness, with a focus on the ASEAN region. The division also promotes the development and management of real estate development projects located mainly in North America and Asia.

The Financial Business Division engages in managing private equity and infrastructure funds, and also offers a wide variety of financial services such as asset financing through Mitsubishi HC Capital Inc. and Mitsubishi Auto Leasing Corporation.

Our Group's mission is to create value through urban development projects that meet the societal needs of cities and the people who live there by leveraging the expertise we have accumulated in real estate, infrastructure, and financial business.

Sustainability

Based on the Three Corporate Principles, which have served as MC's core philosophy since its inception, MC has pursued the simultaneous generation of economic, societal and environmental value. While responding to the requests of all stakeholders, MC has worked to address various societal issues through its business activities and has contributed towards the sustainable development of society as well as value creation.

Midterm Corporate Strategy 2024 further introduces the concept of "Creating MC Shared Value", which builds upon the vision of continuing to grow as a company by addressing the challenges facing society and industry.

By continuously creating MC Shared Value, MC seeks to achieve sustainable growth together with society.

Materiality

MC identified a set of Key Sustainability Issues in 2016 as mileposts for proactively realizing "triple-value growth" through the simultaneous generation of economic, societal and environmental value. While responding to the requests of all stakeholders, MC has worked to address various societal issues through its business activities and has contributed towards the sustainable development of society as well as value creation.

Six years have passed since the Key Sustainability Issues were identified, and the societal issues that should be solved have changed along with the external environment. In light

of those changes, we reviewed the Key Sustainability Issues when we formulated Midterm Corporate Strategy 2024 in order to further raise our corporate value over the medium-to long-term. In order to continuously create MC Shared Value, which is the goal of Midterm Corporate Strategy 2024, we have redefined "Materiality" as a set of crucial societal issues that we will solve through our business activities, and have established "Action Plans," which serve as medium-term plans related to the relevant material issues for each business and initiative of each Division and Business Group.

	Issues	Overview
Realizing a Carbon Neutral Society and Striving to Enrich Society Both Materially and Spiritually	 Contributing to Decarbonized Societies	Contribute to the realization of decarbonized societies by striving to reduce greenhouse gas (GHG) emissions, while providing products and services that support decarbonization during the transition period.
	 Conserving and Effectively Utilizing Natural Capital	Recognizing the Earth itself to be our most important stakeholder, strive to maintain biodiversity and conserve natural capital, and work to create circular economies while reducing our environmental footprint.
	 Promoting Stable, Sustainable Societies and Lifestyles	Promote sustainable societies and lifestyles of the future through businesses in a diverse range of countries and industries, while fulfilling our responsibility to provide a stable supply of resources, raw materials, products, services, etc., in line with the needs of countries and customers.
	 Utilizing Innovation to Address Societal Needs	Create businesses that help to address societal needs while working to spur major industry reforms that are supported by business innovation.
	 Addressing Regional Issues and Growing Together with Local Communities	Strive to contribute to the development of economies and societies by addressing issues facing countries and regions, while seeking to grow together and collaborate with diverse stakeholders, regions and communities.
	 Respecting Human Rights in Our Business Operations	Respect the human rights of all stakeholders involved in promoting our diverse operations worldwide, and pursue solutions for value chain-related issues, while considering the local conditions in each country.
Striving to Serve as a Platform for Generating Triple-value Growth*	 Fostering Vibrant Workplaces That Maximize the Potential of a Diverse Workforce	Recognizing that our human resources are the great assets of our businesses, foster a diverse and versatile talent pool that drives efforts to generate triple-value growth throughout our organization, and also seek to develop an organization where diverse human resources share common values and grow together while furthering their connections and inspiring one another to excel.
	 Realizing a Highly Transparent and Flexible Organization	While swiftly responding to changes in the business environment, strive to realize effective governance on a global, consolidated basis and maintain/strengthen a sound organization that is transparent and flexible.

*Triple-value growth: the simultaneous generation of economic value, societal value, and environmental value

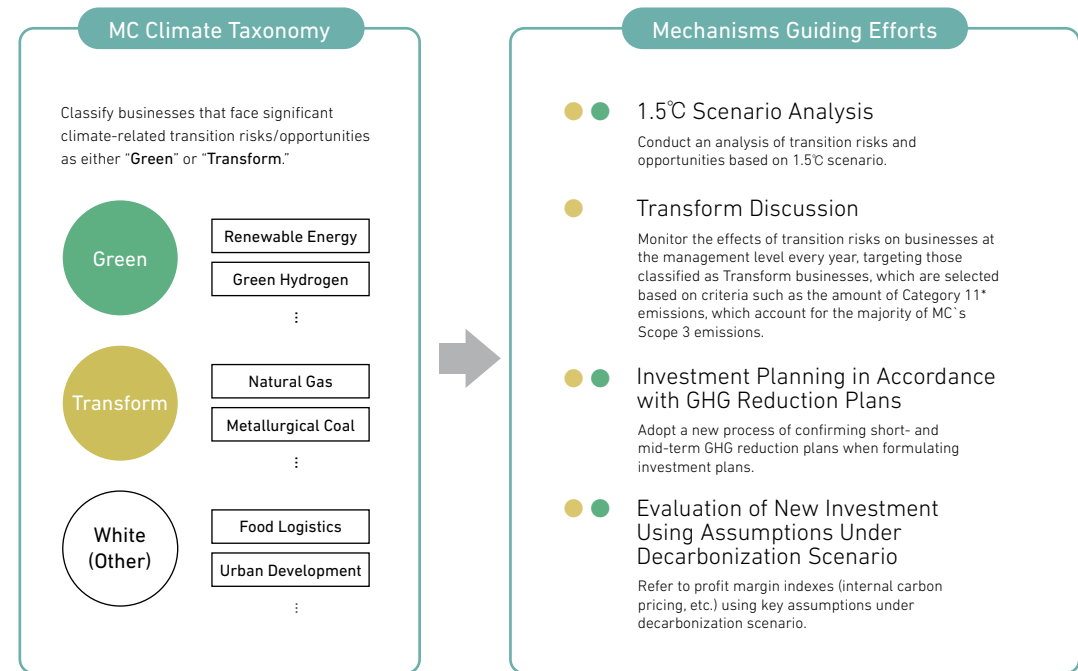

Initiatives for Realizing a Carbon Neutral Society

At MC, we believe that while climate change poses significant business risks, it also presents us with new business opportunities for innovation, disruption and growth. Accordingly, MC has set "Contributing to Decarbonized Societies" as one of its material issues as we strive to achieve sustainable growth.

In shifting to a decarbonized society, it is necessary to formulate specific policies that take into account the actual conditions (energy and power mix, geographical conditions and constraints, stage of economic development, population, etc.) that differ from country to country and region to region, and to steadily implement them one by one. Through our global network of offices and MC Group companies in approx. 90 countries around the world, we work with a wide range of stakeholders around the world each day in developing our business. We utilize this network to accurately grasp individual issues and needs as we aim to realize a decarbonized society through the process of realizing solutions through businesses that connect internal and external know-how.

In October 2021, MC formulated its Roadmap to a Carbon Neutral Society in which we declared our goal of achieving net zero GHG emissions by 2050. As an active player in a variety of industries, including resources and energy, we have formulated a number of goals and action plans in order to fulfill our responsibility to provide a stable supply of energy while striving to achieve a carbon neutral society. In order to achieve the GHG reduction targets (halve by FY2030 (FY2020 baseline), net zero by 2050) outlined in our "Roadmap to a Carbon Neutral Society," as sustainability policies to address climate change, we have introduced mechanisms for simultaneously decarbonizing and reinforcing our portfolio while also classifying each of our businesses according to climate change-related transition risks/opportunities. In addition to the "Scenario Analysis," which MC has been conducting for several years, MC has newly introduced the mechanisms of "Transform Discussions," "Investment Planning in Accordance with GHG Reduction Plans" and "Evaluation of New Investments Using Assumptions Under a Decarbonization Scenario," and has established an appropriate governance and risk management system to ensure that MC's businesses are aligned with a 2050 net zero scenario in terms of both individual projects and company-wide business strategy.

Mechanisms for Simultaneously Decarbonizing and Reinforcing our Portfolio

Corporate Governance and Internal Control System

With the Three Corporate Principles for a corporate philosophy MC strives to continuously raise corporate value through corporate activities rooted in the principles of fairness and integrity. MC believes that by helping to enrich society, both materially and spiritually, it will also meet the expectations of shareholders, customers and all other stakeholders.

In order to achieve these goals, MC sees strengthening corporate governance on an ongoing basis as an important subject concerning management since it is the foundation for ensuring sound, transparent, and efficient management. Therefore, MC is working to put in place a corporate governance system that is even more effective based on the Audit & Supervisory Board System. This includes strengthening management supervision through such measures as (i) appointing Independent Members of the Board who satisfy MC's Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members, and (ii) establishing advisory bodies to the Board of Directors where the majority are Independent Members of the Board and other experts from outside MC. At the same time, this also includes implementation of MC's prompt and efficient decision-making and business execution through enhancing the monitoring function of Board of Directors.

Our efforts to improve and strengthen our internal control system are ongoing in order to increase corporate value through proper and efficient business operations in conformity with the law and our Articles of Incorporation. The internal control system covers compliance, financial reporting, internal auditing and monitoring, management and storage of information, risk management, efficient business execution, ensuring proper business in group management, and the Audit & Supervisory Board Members.

*Committee Chairperson

Compliance

MC has established various internal regulations based on the Three Corporate Principles, MC's guiding philosophy. These include the Corporate Standards of Conduct and the Code of Conduct. When engaging in business, officers and employees are obligated to make compliance their top priority. MC also introduced the post of Compliance Officer and appointed one to each Business Group. These officers are responsible for ensuring compliance in daily business operations.

All company officers and employees are required to take e-learning courses, which include case studies on the Code of Conduct. They must also sign an agreement stating that they understand and will adhere to the rules at all times. These protocols are now being implemented at MC's subsidiaries and affiliates on a global basis, as well. Additional steps that have been taken throughout the MC Group include holding Compliance Discussions to encourage personnel to discuss compliance issues in each workplace by using case studies (i.e. possible violations in view of the office's operations) and seminars, as well as distributing Compliance Case Study Booklets to employees. These measures will ensure ongoing learning and development, not only by employees and officers at MC, but by those at MC's subsidiaries and affiliates as well. As of fiscal year 2019, MC's Chief Compliance Officer shall now not only serve as the chairperson of the Compliance Committee, but also as the chairperson of the Security Trade Control Committee and the Trade Procedures Control Committee.

MC's actions are all based on this spirit of compliance; it remains an essential factor in raising consolidated corporate value and we remain committed to continuously upgrading and reinforcing our compliance initiatives.

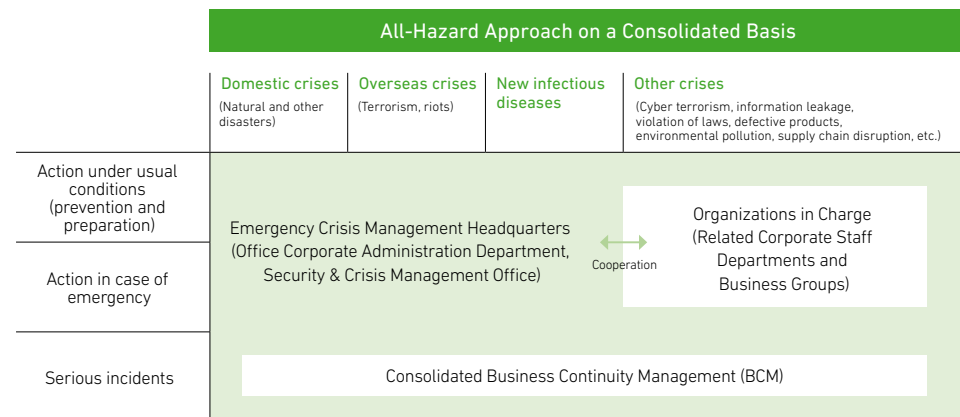

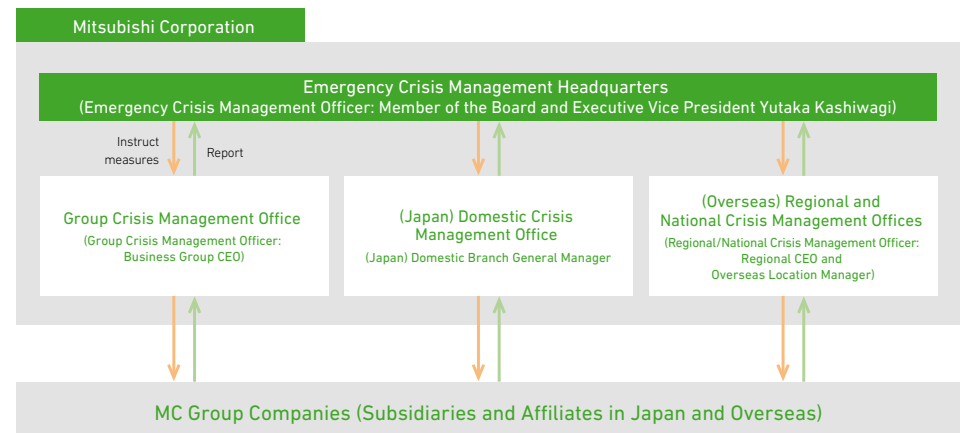

Crisis Management and Business Continuity Management on a Consolidated Basis

MC has built up a structure for securing the lives and safety of employees and their families as we respond on a consolidated basis to all crises that impact our profit and business continuity by linking together each Business Group and Regional National Crisis Management Office under the management and supervision of the Emergency Crisis Management Officer.

Based on MC's "all-hazard approach," this structure anticipates all kinds of risks, such as major natural disasters, acts of terrorism, riots, new infectious diseases, supply chain disruptions, legal transgressions, and cyber incidents, and carries out on a consolidated basis response measures under usual conditions and in the event that a crisis does occur. In particular, in the event of a serious incident impacting the lives and safety of our employees, as well as the continuity of critical business operations, we will respond under the company-wide direction of the Emergency Crisis Management Officer.

Since 2018, MC adopted "business continuity management (BCM)" for its core business companies (selected from among MC Group companies) to establish and strengthen our consolidated framework designed to equip us with the business continuity capabilities needed to respond appropriately to major crisis situations.

BCM refers to comprehensive management activities based on an all-hazard risk and impact analysis that takes into account the business characteristics (business type and location) of the operating company, which include the formulation of initial response and BCP, establishment of a structure, and implementation of an ongoing PDCA cycle through education and training.

Note: While companywide action to deal with serious incidents shall be taken under the direction of the Emergency Crisis Management Officers, compliance-related incidents shall be dealt with under the direction of the Chief Compliance Officers.

CSR

(Corporate Social Responsibility)

MC conducts CSR initiatives in line with three overarching themes: "Realizing an Inclusive Society," "Empowering the Next Generation" and "Conserving the Environment." In addition, MC provides support for regions affected by natural disasters, including recovery efforts for the Great East Japan Earthquake. Our employees continue to actively participate in long-running programs that focus on contributing to the communities in which we operate on a global basis.

MC's commitment to contributing to building prosperous, sustainable societies in the places where we operate worldwide is deeply embedded in our corporate culture based on our corporate philosophy, the Three Corporate Principles. MC established an office to oversee social and environmental affairs in 1973 in recognition that, as good corporate citizens, companies should actively pursue initiatives to contribute to society, and that the expense of those activities should be borne as part of the social cost of doing business before reaping any profits. Since then, MC has created and promoted numerous self-driven CSR initiatives with the aim of bettering our global society.

For more information on MC's CSR initiatives, please visit our website.

1. Realizing an Inclusive Society

MC aims to help realize a society where everyone can play an active role. We are continuing our activities to contribute toward a world where everyone can respect each other and coexist regardless of background, physical condition or way of life.

Main Activities

- Friendship Camp for Mothers and Children (1974-)
- Museum and Art Gallery Program for People with Impairments (2005-)
- DREAM AS ONE. (2014-)
- Para-Sports Promotion Project in China (2015-)
- Support for Economically Disadvantaged Children (2020-), etc.

Friendship Camp for Mothers and Children

DREAM AS ONE.
(support for parasports)

2. Empowering the Next Generation

MC will actively support education, research and capacity development in order to contribute to the growth and self-reliance of the next generation who will be responsible for tomorrow's society.

Main Activities

- MC's International Scholarship for Studies in Japan (1991-)
- MC International Scholarship (2000-)
- Mitsubishi Corporation Art Gate Program (2008-)
- MC Overseas Study Scholarship for High School Students (2019-)
- JEES-Mitsubishi Corporation Science Technology Student Scholarship (2021-), etc.
